Free Mozilla Firefox 3.5.4 (Macintosh) I did the same fix but it did not work. I tried to start a new profile in firefox (even deleted the user profile). I even tried to disable extensions but it did not work. A: Download Firefox as a zip file from and copy to /Applications Renaming the Firefox folder to something like 'Firefox-old' (lower case) Open up the Apple Store and get Firefox 5, or 'Add-on Manager' (preferably the latter) Remove the files /Applications/Firefox-old/ Paste the contents of the zip file /Applications/Firefox.app/Contents/Resources/firefox-bin/ In the Firefox preferences, navigate to Advanced > Reset User Profile (or something like that) Relaunch Firefox Update: Assuming you downloaded the zip file from You need to: Find the file called firefox-bin Copy it to /Applications/Firefox.app/Contents/Resources Open Firefox and type about:support/about-addons/choose-default Select the default and press "Click here to install" Hope this helps!
