## What's New In IrfanPaint?

This is a simple yet powerful image painting tool that allows users to change the look of their images, as if they were using a paintbrush. It features an easy-to-use interface, with high precision and consistency in regards to the details provided for each of the tools. The tool is loaded directly from the viewer's menu, as an external plug-in, right alongside the viewer. Users can operate this tool by simply clicking the "Pencil" icon, that is featured in the viewer's toolbar, or by hovering their mouse pointer over the preview window. The "Pencil" tool allows users to access their chosen image and start their painting tasks. Depending on the layer selected in the preview window, a preview image will be displayed, which will show the effect of the current brush in motion. A set of tools will be accessible to the user, one by one, in order to perform different editing operations on the image. Once the desired painting operation has been initiated, a "Stamp" icon will appear in the bottom right corner of the viewer, at the very bottom of the image's frame. Clicking on it will allow users to access a preview window and an enhanced set of tools, which are displayed from left to right, as in a typical paint program. The tool is customizable, allowing for a variety of painting tips and options to be chosen. The "Pencil" tool allows users to access and modify the brush configuration and behavior. One will be able to access the customization window, located on the left of the preview window, by clicking on the "+" icon. The "stroke style" will display the currently selected brush stroke in the preview window. The top of the customization window will display the currently selected pen tip. By clicking on the various icons, one will be able to modify the selected pen, brush and tool settings. One will have access to all the usual editing tools such as: brush, line, eraser and fill bucket, or the tool will be displayed in the center of the screen. To open the image edit window, an icon will be displayed below the right click area, where people will be able to access the image edit window. By default, the image will be displayed in the background, in a preview mode. Depending on the tool selected in the tool window, a different icon will be displayed in the preview window, offering a range of different operations and settings, such as: image rotation,
